

Described from the holotype and 21 paratype workers collected at Honolulu, Hawaii, April 14, 1947 by T. F. Chong, of the Division of Foreign Plant Quarantines, Bureau of Entomology and Plant Quarantine, United States Department of Agriculture. The ants were found "in or on" an orchid plant, *Dendrobium moschatum* Wall, the shipment of which originated at the locality mentioned above. The holotype and paratype specimens, which bear U. S. National Museum No. 58660, have been placed in the United States National Museum.

One paratype is slightly smaller than the holotype, measuring 2 mm. in length.
