

FIG. 1. Growth curve for the imaginal leg discs of polymorphic small *E. hamatum* larvae. The calculated slope is 2.864.

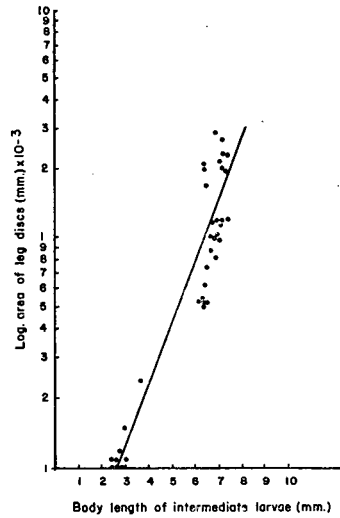

FIG. 2. Growth curve for the imaginal leg discs of the polymorphic intermediate *E. hamatum* larvae. The calculated slope is 1.785.

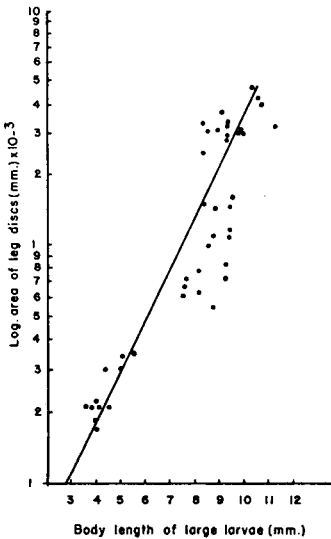

FIG. 3. Growth curve for the imaginal leg discs of the large *E. hamatum* larvae. The calculated slope is 1.635.
