

A New Species of Ant from Tennessee
(Hymen.: Formicidae).

BY LAURENCE GODDARD WESSON, Haverford College,
Haverford, Penna.

In my material from Nashville, Tennessee, Dr. W. M. Wheeler, of Harvard University, pointed out a form which proves to be a new species of *Dichothorax* and is of special interest as it belongs to a small and little known group. I take pleasure in naming it after Dr. W. M. Mann from whom I have received many kind favors.

Leptothorax (Dichothorax) manni sp. nov.

Worker: length 2.75-3.5 mm. Mandibles rather long, triangular, the terminal tooth prominent. Clypeus moderately
