TAXONOMIC STRUCTURE OF THE GENUS *MYRMICA* (HYMENOPTERA,
FORMICIDAE) OF EURASIA. NOTE 1

Institute of Zoology, Ukrainian Academy of Sciences, Kiev, Ukraine

S u m m a r y

A survey of Eurasian *Myrmica* is given. The species fall into 8 groups, i. e. *rubra* (11 species), *rugosa* (7 species), *scabrinodis* (16 species), *lobicornis* (18 species), *schencki* (4 species), *luteola* (1 species), *arnoldii* (2 species), and *ritae* (5 species). The problems of zoogeography and phylogeny of the genus are discussed.
