Introduction

Subfamily Ponerinae Lepeletier

- Ectatomma tuberculatum* (Olivier)
= *E. tuberculatum acrista* Forel, n. syn.
Ectatomma regis Kusnezov
Pachycondyla lenkoi n. sp.
Ponera opaciceps Mayr
Ponera trigona Mayr
Ponera foreli Mayr
Ponera idelettae Santschi
Ponera vernacula n. sp.
Odontomachus spissus, n. sp.

Subfamily Myrmicinae Lepeletier

- Pheidole megacephala* (Fabricius)
Rogeria germaini Emery
Rogeria sicaria n. sp.
Tetramorium caespitum (Linné)
Gymnomyrnex minusculus n. sp.
Eurhopalothrix spectabilis n. sp.
Rhopalothrix acutipilis n. sp.
Cyphomyrmex Mayr
= *Cyphomannia* Weber, n. syn.
Cyphomyrmex plaumannii n. sp.
Cyphomyrmex morschi Emery
Mycetophylax conformis (Mayr) n. comb.
= *Myrmicocrypta brittoni* Wheeler, nov. syn.
= *Mycetophylax brittoni* var. *littoralis* Weber, n. syn.

Subfamily Dolichoderinae Forel

- Monacis andina* n. sp.

Introduction

This paper is a further contribution in a series presenting scattered odds and ends of taxonomic or faunistic information on Neotropical ants. The first part was published in *Studia Entomologica* (N.S.) 3: 417-466 (1960).

The following collections provided the material on which the present investigation is founded: Collection of Father Thomas Borgmeier, O.F.M. (CTB), now in the custody of the author;
