

## P R E F A C E.

---

THE object of the present Catalogue is to give a complete list of all the known genera and species of DORYLIDÆ and THYNNIDÆ, including those which have been previously recorded, together with descriptions of such as appear to be hitherto undescribed.

The letters B.M. in the margin indicate the species contained in the Collection of the British Museum.

JOHN EDWARD GRAY.

1st June, 1859.
